

# Invest In Success

With *Soundfield Amplification Systems* from *Lifeline*, you're investing in the success of both teachers and students in all standard classroom settings. Our high-quality classroom systems amplify the teacher's voice for all students to hear. With *Lifeline's* equipment packages and customer support personnel, you can expect sound results.

Our experts know the **A+ Amplification System** will bring successful communication and learning into the classroom. Gone are the days of vocal strain for teachers and diminished attention spans for students. With *Lifeline* systems, both teacher and student benefit from clear message transmission.

## How It Works

Our *Soundfield Amplification Systems* create a wireless communication link between the teacher and the students. The teacher wears a microphone (several options available) attached to a wireless transmitter. The teacher talks in his/her normal speaking voice and the microphone picks up the teacher's voice sending it through the receiver and amplifier and out through the speakers. Several speaker options are available. The teacher's voice is then equally amplified throughout the room no matter where the teacher or students are located.

## WHAT YOU GET

- 1 TRANSMITTER**
  - Unique transmitter design allows for 35 VHF frequencies – enough to serve every room in most schools
  - One handy switch controls the stand-by and on/off functions. The stand-by function gives user flexibility to have microphone on stand-by while the system remains on
  - Convenient belt clip provided to attach transmitter to user's waist or pocket
- 2 RECEIVER**
  - Power indicator light conveniently shows if power source is correctly plugged in and shows reception from the transmitter
  - All steel casing for extra durability
  - Collapsible antenna for range control
- 3 AMPLIFIER**
  - Wide-range tone control for increased intelligibility
  - Auxiliary inputs can be used to plug in a CD player, tape deck, or television, etc.
  - Two-channel for team teaching
- 4 SPEAKERS**
  - Three different speaker options available: bookshelf speakers, individual ceiling speakers, and a ceiling cluster.
  - All speakers are designed for ease of use during installation.
  - All speakers are designed for maximum clarity and intelligibility.
- 5 MICROPHONE AND CABLE**
  - Detachable microphones
  - Detachable microphone cable
  - Easy to wear and use
  - Custom designed poly-shield coating protects cable from everyday wear and extends life
  - Multiple microphone options available
- 6 OTHER ITEMS INCLUDED**
  - Internal rechargeable battery—long-lasting 9-volt Nickel Metal Hydride
  - Lifeline battery charger
  - Durable charging cable
  - 150' speaker cable

## What sets us apart from the rest of the class.

**FIELD-REPLACEABLE PARTS** for on-site repair or replacement.

Low-profile microphone cable detaches from transmitter.

Microphone is detachable from microphone cable.

Battery remains in the transmitter while being recharged.
